

Meeting 11/10

smoke temp motion humidity light intensity

home management, mobile

todo: standards for home management systems (smart grid?)

ieee 2030 standard - can we make element for it

email godrich about it

wifi, zigby, communication protocol?

start defining features desired

then compare options (arduino, texas instrument, etc)

scope project / proof of concept, do adaptation for project, develop app to demo

dont worry about scale - big picture, see where it fits in, what is mandatory for proof of concept?

(ex: bluetooth for proof of concept)

if not in existence, want to IP it?

lawyer of intellectual property at rutgers meeting later.

could use something like alexa, as an option to interface (could be a bit challenging)
